DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/7/09 has been entered.

Claim Rejections - 35 USC § 112

2. Claims 3, 6, and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 is vague. While the preamble of the claim recites quantitatively measuring adiponectin in a biological liquid, the body of the claim recites the use of a polyclonal antibody that is only specific for native adiponectin. Thus, the claimed method would apparently be directed to measuring just native adiponectin in the biological liquid and not adiponectin in general. The claim is also incomplete because it lacks a correlation step that relates the degree of latex-particle-agglutination to how much native adiponectin is present in the biological liquid.

Claim 7 is vague. While the preamble and last step of the claim recites measuring the level of adiponectin in a biological liquid, the body of the claim recites the

use of a polyclonal antibody that is only specific for native adiponectin. Thus, the claimed method would apparently be directed to measuring the level of native adiponectin in the biological liquid and not adiponectin in general.

Allowable Subject Matter

3. Claims 1 and 5 are allowed.
